

INDIGENOUS LANGUAGES GOING EXTINCT

Psychoneurolinguistic grounds

ONLINE April 22, 2025 at

4pm CET

Neurolinguistics provides valuable data for revitalizing endangered languages using psychoneurolinguistic strategies.

Join us for a webinar that will explore strategies for preventing language attrition through a neurocognitive framework. We will examine the cognitive processes involved in speech production and

perception in bilingual and

REGISTER

multilingual individuals, focusing

NOW:

on how neurophysiological mechanisms can influence language maintenance and decline.

FEATURING:

Dr. Polina Dashinimaeva

Dr. Dashinimaeva is a Doctor of Philology in Linguistics from Irkutsk State Linguistic University. She is a professor at Buryat State University and is an Attending

**Lecturer at Northern Hebei University in
China.**
